Extended Facilities**

Tuckwell Farms Excavator dug topsoil, extracted subsoil from bund and filled subbase, created and compacted hard standing & lifted container to position

Brett Aggregates supplied crushed hardcore and Type 1 Granite to build the hard standing for access

Jewsons provided reinforced lintels to cut as container support bases, ballast and drainage stone to ensure long term stability of shed subbase

Professional Building Supplies (PBSL) provided drainage pipes & geotextile

**Electrical Supply relocated to temporary board
60m³ of topsoil stripped by Tuckwell Farms
100m³ subsoil built as container platform**

**Existing Container then moved
7 meters towards west hedge
ready for 3 Pentaver containers.**

Hard standing created to facilitate mobility access

**Existing Container positioned
leaving space for 3.5m leanto
along side and to the front**

**Relocated Container ready
to be joined to 3 incoming
containers craned in by
Portable Space from
hardstanding supplied by
Brett Aggregates. Drainage
installed and hardcore
inserted by Tom Kerry's
excavator & consolidated**
